July 1 1886

Dear Dr. Gray

All attended to - 250
Copies ordered - And I hope
soon to send you a life size
photo for the Hestarian. it is
not very good - but we think
it better than any Crayon we
have had - except the first
and I feel that we can do
no better -

Trelean has left - seems
happy and working hard
but Mr Shaw is still unap-
proachable - suspicious - and
unwilling to enter upon
any new idea - or - I might
say - any botanical idea

How well I see the reasons
for many of father's actions
now - no wonder that he had
not the patience to talk to a
man of such narrow views - a
man who had so mercenary -
I must say how a way of
looking at the study which father
worshipped - to which his life was
devoted, and which Mr Shaw could
have furthered so much had
he had but ordinary intelligence
— we must indeed be thankful
that you have accomplished so
much - We are here still -
worried - bustling - remoting -
again I appreciate why father
would not make any
changes about the house - and
why he invariably replied to
my urgent entreaties to do
this and that - "it is good

enough for me and will
last as long as I do."

In my innocence I had
supposed that all that was necess-
ary was to give the order - and
the work would be done - in the
ideal way - without disturbing you
or any thing else about the house -

— But what it means to have
even the simplest thing done
here you have no idea
such annoyance such swindling -
such delay - deceit and injury
to everything else -

Once fixed - I hope that we shall
not see a workman there
again for years - we will try
to do all that is necessary now -
and in early fall - so that we

Can enjoy while ~~and~~ I can
work - These things ~~and~~ have
prevented my working -

The wonder father ~~was~~ ^{was} ~~unwilling~~
to make any changes! -

We shall try to see you -
will probably leave for the
East after my uncle's & Lou Widdie's
Aug. 22. - in La Salle Ill
- Sept 22. The Gynecological
meets in Baltimore -

With best wishes from wife
and self

Truly yours

Geo. Engelmann
